B. TECH. (SIXTH SEMESTER)

END SEMESTER

EXAMINATION, 2022

(CS/IT/ME/CE/EC)

CAREER SKILLS

Time : Three Hours

Maximum Marks : 100

Instructions for students :

- (i) This paper consists of 100 questions.
- (ii) All questions are compulsory.
- (iii) Each question carries equal marks.
- (iv) Calculator is not allowed.
- (v) There is no negative marking.
- (vi) It is compulsory to mention the SET in the OMR sheet.

P. T. O.

(2)

XCS-600/601(B)

SET—B

1. Uday will take 40 days to complete a task by working with his normal efficiency. In how many days the work can be completed if he improves his efficiency by 100% after completing 50% of work with his normal efficiency ?
(a) 28 days
(b) 30 days
(c) 35 days
(d) 39 days
2. Pipe 1 can fill a tank in 12 hours, pipe 2 in 20 hours while a leak can empty the tank in 30 hours. Initially, all 3 are opened. After 5 hours, pipe 1 is closed. In how much more time will the tank get completely filled ?
(a) 20 hours
(b) 30 hours
(c) 50 hours
(d) 60 hours

(3)

XCS-600/601(B)

3. Hardik takes twice as much time as Rahul takes to complete a given task. They can complete the work in 14 days by working simultaneously. In how many days can Rahul alone do it ?
(a) 12 days
(b) 16 days
(c) 21 days
(d) 29 days
4. 12 men can complete a work in 9 days. After they have worked for 5 days, 8 men left the work. How many days will they take to complete the remaining work ?
(a) 22 days
(b) 16 days
(c) 12 days
(d) 10 days
5. Twenty men can do a work in 40 days by working for 8 hours a day. The same work can be done by thirty Robots in 80 days by working for 6 hours a day. What is the ratio between the efficiency of a man and a Robot ?
(a) 2 : 3
(b) 3 : 2
(c) 4 : 9
(d) 9 : 4

P. T. O.

(4) XCS-600/601(B)

6. Yesterday Ashwin completed 300 units of work at the rate of 5 units per hour. Today he completed the same unit of work but with 40% more efficiency than yesterday. What is the approximate difference in the time he took to complete the work yesterday and the time he took today ?

- (a) 13 hours
- (b) 15 hours
- (c) 17 hours
- (d) 19 hours

7. If 50 men can do a certain job in 32 days working 6 hours/day, then what percentage of that work which can be completed by 35 men in 48 days, working 4 hours/day ?

- (a) 90%
- (b) 60%
- (c) 80%
- (d) 70%

(5) XCS-600/601(B)

8. Ajay went to Hyderabad from Bangalore via Chennai by car. The distance from Bangalore to Chennai is 75% of the distance from Chennai to Hyderabad. The average speed from Bangalore to Chennai was half as much as that from Chennai to Hyderabad. If the average speed for the entire journey was 63 km/h. What was the average speed from Bangalore to Chennai ?

- (a) 45 km/h
- (b) 38 km/h
- (c) 34 km/h
- (d) Cannot be determined

9. Five friends, Akshita, Bimala, Cheryl, Divya and Esha are to be arranged in a line. How many such arrangements are possible if Bimala is not allowed to stand next to Divya ?

- (a) 720
- (b) 360
- (c) 240
- (d) 72

P. T. O.

10. There are 11 boys and 9 girls in a class. What is the total number of handshakes if each student handshakes with every other student of the class ?

- (a) $11C2 + 9C2$
- (b) $11C2 \times 9C2$
- (c) $20C2$
- (d) None of the above

11. What is the probability of arranging letters of the word AGAIN such that vowels are always together ?

- (a) 0.4
- (b) 0.3
- (c) 0.2
- (d) 0.1

12. A candidate is required to answer 7 questions out of 12 questions, which are divided into two groups, each containing 6 questions. He is not permitted to attempt more than 5 from either

group. In how many different ways can he choose the seven questions ?

- (a) 640
- (b) 780
- (c) 920
- (d) 1020

13. A train 150 m long passes a pole in 15 seconds and it crosses another train whose length is $\frac{1}{3}$ rd of its length travelling in the opposite direction in 8 seconds. What is the speed of the second train ?

- (a) 60 km/h
- (b) 90 km/h
- (c) 72 km/h
- (d) 54 km/h

14. If Akhil will travel with speed 4 m/s, he will reach office 5 min. late. But, if he increases his speed by 25%, he will reach office 10 min. early. In how much time he should reach his office if he neither reaches early nor late ?

- (a) 75 min.
- (b) 60 min.
- (c) 55 min.
- (d) 70 min.

(8)

XCS-600/601(B)

15. Mukesh goes 6 km against the current in 1 hr. and along the current in 30 minutes. How long will it take to go 12 km in stationary water ?

(a) 1 hour 20 min.

(b) 3 hours 30 min.

(c) 2 hours 40 min.

(d) 4 hours 15 min.

16. The inlet pipe A can fill a tank alone in 10 hours while another inlet pipe B can fill the tank alone in 20 hours. There is an outlet pipe which can empty the tank alone in 15 hours. In how much time the tank will be completely filled when all 3 pipes were opened simultaneously ?

(a) 10 hours

(b) 12 hours

(c) 15 hours

(d) 20 hours

(9)

XCS-600/601(B)

17. Alok can beat Akhil by 20 m in a 100 m race and Akhil can beat Aman by 30 m in a 100 m race. If Alok and Aman compete against each other in a 125 m race, who will win and by how many metres ?

(a) Alok by 55 m

(b) Aman by 55 m

(c) Alok by 25 m

(d) Aman by 25 m

18. The price of a Mobile and a Tablet is ₹ 15,000 and ₹ 10,000 respectively. In the next one year, if the price of the Mobile is increased by 20%, while that of the Tablet is decreased by 10%, find the new ratio of their prices :

(a) 3 : 2

(b) 3 : 4

(c) 2 : 3

(d) 2 : 1

P. T. O.

(10)

XCS-600/601(B)

19. In how many ways can the letters of the word TOPPER be arranged such that all the consonants always appear together?

- (a) 720
- (b) 120
- (c) 84
- (d) 72

20. BCCI announced a squad of 17 players for the upcoming one-day match with New Zealand. In how many ways we can select playing 11 for the next match if Rohit Sharma must play being the captain and Jaspreet Bumrah is unfit for the next match?

- (a) 15C9
- (b) 15C10
- (c) 16C11
- (d) 16C9

21. A truck covers a certain distance in 8 h at the speed of 50 km/h. What is the average speed of a car which travels a distance which is 20% more than the distance travelled by truck while taking 25% less time?

- (a) 90 km/h
- (b) 80 km/h
- (c) 75 km/h
- (d) 70 km/h

(11)

XCS-600/601(B)

22. 5 women working together can complete a piece of work in 8 days, whereas 10 children take 10 days to complete the same piece of work. How many days will 2 women and 15 children together take to complete the same piece of work?

- (a) 3 days
- (b) 4 days
- (c) 5 days
- (d) 6 days

23. The speed of a train is 73 km/h (the speed remains same). The bus started the journey towards the destination at 12 p.m. It reached the destination which was 365 km away from its starting point at 8 p.m. and a halt was scheduled on the way. For how long was the halt scheduled?

- (a) 3 hours
- (b) 4 hours
- (c) 5 hours
- (d) Cannot be determined

P. T. O.

(12)

XCS-600/601(B)

24. Rekha had 1 rupee, 2 rupees and 10 rupees coins in the ratio 10 : 17 : 7 respectively. If she had total of ₹ 2,280, how many 2 rupees coins did she have ?

- (a) 340
- (b) 170
- (c) 510
- (d) Cannot be determined

25. Three fair coins were tossed simultaneously. What is the probability of getting at most 2 tails ?

- (a) $1/8$
- (b) $3/8$
- (c) $5/8$
- (d) $7/8$

26. Nine women and nine men are to sit round a circular table such that there is a man on either side of every women; then how many seating arrangements are possible ?

- (a) $9! \times 9!$
- (b) $8! \times 8!$
- (c) $8! \times 9!$
- (d) $8! \times 8! \times 2$

(13)

XCS-600/601(B)

27. Rakesh can do a work in 5 days while Arun can do the work alone in 15 days. In how many days can the work get completed if they work simultaneously ?

- (a) 4 days
- (b) 5 days
- (c) 6 days
- (d) 7 days

28. A 5-digit number divisible by 3 is to be formed using the numerals 0, 1, 2, 3, 4 and 5 without repetition of digits. What is the total number of ways in which this can be done ?

- (a) 360
- (b) 240
- (c) 218
- (d) 216

29. Three numbers are in the ratio 3 : 4 : 5 and the sum of their squares is 1250. Find the sum of the three numbers :

- (a) 30
- (b) 50
- (c) 60
- (d) 90

P. T. O.

(14) XCS-600/601(B)

30. A bus driver can see a car 350 m away coming from the opposite direction at a speed of 20 m/sec. If the speed of the bus is 15 m/sec, what is the distance between the 2 vehicles after 20 seconds ?

- (a) 150 m
- (b) 250 m
- (d) 350 m
- (d) 450 m

31. A task is assigned by team leader to 2 members Anthony and Iqbal separately. The probability that Anthony will complete the task is $\frac{2}{3}$ and the probability that Iqbal will complete the task is $\frac{3}{4}$. What is the probability that the task will be completed ?

- (a) $\frac{11}{12}$
- (b) $\frac{10}{11}$
- (c) $\frac{8}{9}$
- (d) $\frac{7}{8}$

(15)

XCS-600/601(B)

32. One card is drawn from a pack of 52 cards. What is the probability that the card drawn is of black colour ?

- (a) $\frac{27}{52}$
- (b) $\frac{4}{13}$
- (c) $\frac{7}{13}$
- (d) None of the above

33. Two fair dice were rolled simultaneously. What is probability of getting a sum of 4 or less ?

- (a) $\frac{1}{6}$
- (b) $\frac{1}{5}$
- (c) $\frac{1}{4}$
- (d) $\frac{1}{3}$

34. Rajeev, Sachin and Karan entered into a partnership. Rajeev invested 200% more than Sachin while Karan invested 50% more than Sachin. At the end of the year the profit earned is ₹ 11,000. What is the share of Sachin ?

- (a) ₹ 1,200
- (b) ₹ 1,500
- (c) ₹ 2,000
- (d) ₹ 2,500

P. T. O.

(16)

XCS-600/601(B)

35. There are 11 stations on a particular route including the starting and the last station. If a new station is introduced, find the number of new tickets to be printed. (Assume that a person can choose to go from any source to any destination) :

(a) 0

(b) 11

(c) 20

(d) 22

36. If $a/3 = b/4 = c/5$, then what is the value of $(a + b + c)/a$?

(a) 2.4

(b) 3.0

(c) 4.0

(d) 5.4

37. P and Q are 2 numbers such that $P : Q = 2 : 3$. If 5 is subtracted from each, then new numbers are in the ratio 3 : 5. What is the difference between P and Q ?

(a) 10

(b) 15

(c) 20

(d) 25

(17)

XCS-600/601(B)

38. The odds in favour of Amar, Akbar and Anthony being the topper of class are 1 : 2, 1 : 3 and 1 : 4 respectively. What is the probability that none of them topped the class ?

(a) 47/60

(b) 13/60

(c) 31/60

(d) 29/60

39. Aakash and Anant are playing chess. The probability that Aakash wins a match between him and Anant is 0.8. Both played 3 games which are independent to each other. What is the probability that Aakash will win exactly 2 games ?

(a) 48/125

(b) 53/125

(c) 63/125

(d) 87/125

40. A single digit natural number is to be chosen. What is the probability that this number is not a prime number ?

(a) 5/9

(b) 2/3

(c) 7/9

(d) 8/9

P. T. O.

(18)

XCS-600/601(B)

41. A 250 m train crosses a platform which is 125 m long in 15 seconds. In how much time it will cross a person moving (on platform) in opposite direction with speed of 18 km/h ?

- (a) 6.66 sec
- (b) 8.33 sec
- (c) 5.22 sec
- (d) 9.99 sec

42. The team of 7 employees is to be formed out of 6 ladies and 8 gents for the upcoming meeting. In how many ways this can be done if at most three gents are included ?

- (a) 982
- (b) 246
- (c) 1174
- (d) 1016

43. Salma can do a work in 15 days and Waheeda can do the same work in 20 days. In how many days the work is completed if they work on alternate days and it is known that work was started by Waheeda ?

- (a) 19 days
- (b) 18 days
- (c) 17 days
- (d) 16 days

(19)

XCS-600/601(B)

44. P and Q together can do a job in 6 days. Q and R can finish the same job in $60/7$ days. P started the work and worked for 3 days. Q and R continued from where P left and it takes 6 more days for them to complete the job. What is the difference of days in which R and P can individually complete the job ?

- (a) 5 days
- (b) 10 days
- (c) 15 days
- (d) 20 days

45. The upstream speed of a boat is 6 km/h and its downstream speed is 15 km/h. How much distance it will cover in 4 hours while moving in still water ?

- (a) 18 km
- (b) 24 km
- (c) 42 km
- (d) 60 km

P. T. O.

46. A and B are 2 non-mutually exclusive independent events. What is $P(A \cup B)$, if $P(A) = 1/2$ and $P(B)$ is $1/3$?

- (a) $5/6$
- (b) $2/3$
- (c) $3/5$
- (d) $11/17$

47. The probability that a car accident is due to faulty brakes is 0.02, the probability that a car accident is correctly attributed to faulty brakes is 0.95, and the probability that a car accident is incorrectly attributed to faulty brakes is 0.01. What is the probability that a car accident, which is attributed to faulty brakes, was due to faulty brakes?

- (a) 0.66
- (b) 0.55
- (c) 0.99
- (d) 0.88

48. Taniya is twice as fast as Geeta. The journey covered by Geeta in 50 minutes will be covered by Taniya in how much time?

- (a) 100 min.
- (b) 50 min.
- (c) 25 min.
- (d) Cannot be determined

49. The speed of a man increases by 11.11% as compared to his normal speed. If he is covering the same distance, by what % does the time taken decrease?

- (a) 14.28%
- (b) 12.5%
- (c) 9.09%
- (d) 10%

50. A person starts from point A and is moving at 25 m/sec. After 4 seconds, B starts in the same direction at a speed of X m/sec. If B overtakes A 10 seconds after he started, find the ratio of the speeds of B to A:

- (a) 7 : 3
- (b) 7 : 5
- (c) 5 : 1
- (d) 5 : 3

Directions (Q. Nos. 51-59) : Fill in the blanks with the most appropriate option to make the sentences meaningful :

51. The professor was known on campus as a _____ character; bland but harmless and noble in his ideals.

- (a) staid
- (b) dogmatic
- (c) modicum
- (d) sterile

52. Because he was so _____, the athlete was able to complete the obstacle course in record time.

- (a) belligerent
- (b) nimble
- (c) demure
- (d) volatile

53. When the _____ smell of rotten eggs filled the house, I held my nose.

- (a) insipid
- (b) bland
- (c) pungent
- (d) flavorless

54. With sunscreen and a good book, April _____ by the pool in her lounge chair while the children swam.

- (a) ensconced
- (b) lolled
- (c) interspersed
- (d) transcended

55. Nathan had a terrible habit of boasting so much about his smallest accomplishments that his _____ became renowned throughout the small college campus.

- (a) vainglory
- (b) audacity
- (c) diffidence
- (d) tempestuousness

(24)

XCS-600/601(B)

56. Only a small number of people in the audience laughed at the comic's _____ sense of humor, while the rest found him to be too sarcastic.

(a) consequential

(b) avaricious

(c) mordant

(d) dauntless

57. He has long been a(n) _____ of year-round school, believing it would significantly improve earning and ease the burden on working parents.

(a) advocate

(b) euphemism

(c) detractor

(d) epiphany

(25)

XCS-600/601(B)

58. Tired of hearing the child whine for more candy, the babysitter finally _____ and offered him a piece of chocolate.

(a) relented

(b) abated

(c) rendered

(d) placated

59. I'll tell you a funny story, if I may _____ from my subject for a moment.

(a) adhere

(b) digress

(c) stay

(d) chide

P. T. O.

Passage 1

Crinoline and croquet are out. As yet, no political activists have thrown themselves in front of the royal horse on Derby Day. Even so, some historians can spot the parallels. It is a time of rapid technological change. It is a period when the dominance of the world's superpower is coming under threat. It is an epoch when prosperity masks underlying economic strain. And, crucially, it is a time when policy-makers are confident that all is for the best in the best of all possible worlds. Welcome to the Edwardian summer of the second age of globalization. Spare a moment to take stock of what's been happening in the past few months. Let's start with the oil price, which has rocketed to more than \$65 a barrel, more than double its level 18 months ago. The accepted wisdom is that we shouldn't worry our little heads about that, because

the incentives are there for business to build new production and refining capacity, which will effortlessly bring demand and supply back into balance and bring crude prices back to \$25 a barrel. As Tommy Copper used to say, 'just like that'. Then there is the result of the French referendum on the European Constitution, seen as thick-headed luddites railing vainly against the modern world. What the French needed to realize, the argument went, was that there was no alternative to the reforms that would make the country more flexible, more competitive, more dynamic. Just the sort of reforms that allowed Gate Gourmet to sack hundreds of its staff at Heathrow after the sort of ultimatum that used to be handed out by Victorian mill owners. An alternative way of looking at the French "non" is that our neighbours translate "flexibility" as "you're fired".

P. T. O.

(28)

XCS-600/601(B)

Finally, take a squint at the United States. Just like Britain a century ago, a period of unquestioned superiority is drawing to a close. China is still a long way from matching America's wealth, but it is growing at a stupendous rate and economic strength brings geo-political clout. Already, there is evidence of a new scramble for Africa as Washington and Beijing compete for oil stocks. Moreover, beneath the surface of the US economy, all is not well. Growth looks healthy enough, but the competition from China and elsewhere has meant the world's biggest economy now imports far more than it exports. The US is living beyond its means, but in this time of studied complacency a current account deficit worth 6 per cent of gross domestic product is seen as a sign of strength, not weakness.

(29)

XCS-600/601(B)

In this new Edwardian summer, comfort is taken from the fact that dearer oil has not had the savage inflationary consequences of 1973-1974, when a four-fold increase in the cost of crude brought an abrupt end to a post-war boom that had gone on uninterrupted for a quarter of a century. True, the cost of living has been affected by higher transport costs, but we are talking of inflation at 2.3 per cent and not 27 per cent. Yet the idea that higher oil prices are of little consequence is fanciful. If people are paying more to fill up their cars it leaves them with less to spend on everything else, but there is a reluctance to consume less. In the 1970s unions were strong and able to negotiate large, compensatory pay deals that served to intensify inflationary pressure. In 2005, that avenue is pretty much closed off, but the abolition

P. T. O.

of all the controls on credit that existed in the 1970s means that households are invited to borrow more rather than consume less. The knock-on effects of higher oil prices are thus felt in different ways — through high levels of indebtedness, in inflated asset prices, and in balance of payments deficits.

There are those who point out, rightly, that modern industrial capitalism has proved mightily resilient these past 250 years, and that a sign of the enduring strength of the system has been the way it apparently shrugged off everything — a stock market crash, 9/11, rising oil prices — that have been thrown at it in the half decade since the millennium. Even so, there are at least three reasons for concern. First, we have been here before. In terms of political economy, the first era

of globalisation mirrored our own. There was a belief in unfettered capital flows, in free migration. Eventually, though, there was a backlash, manifested in a struggle between free traders and protectionists, and in rising labour militancy.

Second, the world is traditionally as its most fragile at times when the global balance of power is in flux. By the end of the nineteenth century, Britain's role as the hegemonic power was being challenged by the rise of the United States, Germany and Japan while the Ottoman and Hapsburg empires were clearly in rapid decline. Looking ahead from 2005, it is clear that over the next two or three decades, both China and India — which together account for half the world's population — will flex their muscles.

P. T. O.

Finally, there is the question of what rising oil prices tell us. The emergence of China and India means global demand for crude is likely to remain high at a time when experts say production is about to top out. If supply constraints start to bite, any decline in the prices is likely to be short-term cycle affairs punctuating a long upward trend.

Directions (Q. Nos. 60-63) : Based on the passage, answer the following questions and for each question, mark the correct option as your answer :

60. By the expression 'Edwardian Summer', the author refers to a period in which there is :

- (a) unparalleled luxury and opulence.
- (b) a sense of complacency among people because of all-round prosperity.

- (c) a culmination of all-round economic prosperity.
- (d) an imminent danger lurking behind economic prosperity.

61. What, according to the author, has resulted in a widespread belief in the resilience of modern capitalism ?

- (a) Growth in the economies of Western countries despite shocks in the form of increase in levels of indebtedness and inflated asset prices.
- (b) Increase in the prosperity of Western countries and China despite rising oil prices.
- (c) Continued growth of Western economies despite a rise in terrorism, an increase in oil prices and other similar shocks.
- (d) The success of continued reforms aimed at making Western economies more dynamic, competitive and efficient.

P. T. O.

62. Which of the following best represents the key argument made by the author ?

- (a) The rise in oil prices, the flux in the global balance of power and historical precedents should make us question our belief that the global economic prosperity would continue.
- (b) The belief that modern industrial capitalism is highly resilient and capable of overcoming shocks will be belied soon.
- (c) Widespread prosperity leads to neglect of early signs of underlying economic weakness, manifested in higher oil prices and a flux in the global balance of power.
- (d) A crisis is imminent in the west given the growth of countries like China and India and the increase in oil prices.

63. What can be inferred about the author's view when he states as Tommy Cooper used to say "just like that" ?

- (a) Industry has incentives to build new production and refining capacity and therefore oil prices would reduce.
- (b) There would be a correction in the price levels of oil once new production capacity is added.
- (c) The decline in oil prices is likely to be short-term in nature.
- (d) It is not necessary that oil prices would go down to earlier levels.

Directions (Q. Nos. 64–65) : Choose the word/group of words which is Most Similar in meaning to the word/group of words as used in the passage 2 :

64. Epoch :

- (a) Duration
- (b) Generation
- (c) Span
- (d) Era

P. T. O.

(36)

XCS-600/601(B)

65. Squint :

- (a) Sense
- (b) Blink
- (c) Glimpse
- (d) Stage

Directions (Q. Nos. 66–67) : Choose the word/group of words which is Most Opposite in meaning to the word/group of words as used in the passage 2 :

66. Unfettered :

- (a) Restricted
- (b) Dissemble
- (c) Virulent
- (d) Apposite

67. Stupendous :

- (a) Astounding
- (b) Beguiled
- (c) Ordinary
- (d) Mammoth

(37)

XCS-600/601(B)

Passage 2

Many United States companies have, unfortunately, made the search for legal protection from import competition into a major line of work. Since 1980 the United States International Trade Commission (ITC) has received about 280 complaints alleging damage from imports that benefit from subsidies by foreign governments. Another 340 charge that foreign companies “dumped” their products in the United States at “less than fair value.” Even when no unfair practices are alleged, the simple claim that an industry has been injured by imports is sufficient grounds to seek relief.

Contrary to the general impression, this quest for import relief has hurt more companies than it has helped. As corporations begin to function globally, they develop an intricate web of marketing, production, and research relationships. The complexity of these relationships makes it unlikely

P. T. O.

that a system of import relief laws will meet the strategic needs of all the units under the same parent company.

Internationalization increases the danger that foreign companies will use import relief laws against the very companies the laws were designed to protect. Suppose a United States-owned company establishes an overseas plant to manufacture a product while its competitor makes the same product in the United States. If the competitor can prove injury from the imports—and that the United States company received a subsidy from a foreign government to build its plant abroad—the United States company's products will be uncompetitive in the United States, since they would be subject to duties.

Perhaps the most brazen case occurred when the ITC investigated allegations that Canadian companies were injuring the United States salt industry by dumping rock salt, used to de-ice

roads. The bizarre aspect of the complaint was that a foreign conglomerate with United States operations was crying for help against a United States company with foreign operations. The "United States" company claiming injury was a subsidiary of a Dutch conglomerate, while the "Canadian" companies included a subsidiary of a Chicago firm that was the second-largest domestic producer of rock salt.

Directions (Q. Nos. 68–75) : Based on the passage, answer the following questions and for each question, mark the correct option as your answer :

68. The passage is chiefly concerned with :

- (a) arguing against the increased internationalization of United States corporations.
- (b) warning that the application of laws affecting trade frequently has unintended consequences.

P. T. O.

(c) demonstrating that foreign-based firms receive more subsidies from their governments than United States firms receive from the United States government.

(d) advocating the use of trade restrictions for "dumped" products but not for other imports.

69. It can be inferred from the passage that the minimal basis for a complaint to the International Trade Commission is which of the following ?

(a) A foreign competitor has received a subsidy from a foreign government.

(b) A foreign competitor has substantially increased the volume of products shipped to the United States.

(c) A foreign competitor is selling products in the United States at less than fair market value.

(d) The company requesting import relief has been injured by the sale of imports in the United States.

70. The last paragraph performs which of the following functions in the passage ?

(a) It summarizes the discussion thus far and suggests additional areas of research.

(b) It presents a recommendation based on the evidence presented earlier.

(c) It discusses an exceptional case in which the results expected by the author of the passage were not obtained.

(d) It cites a specific case that illustrates a problem presented more generally in the previous paragraph.

71. The passage warns of which of the following dangers?

(a) Companies in the United States may receive no protection from imports unless they actively seek protection from import competition.

(b) Companies that seek legal protection from import competition may incur legal costs that far exceed any possible gain.

(c) Companies that are United States-owned but operate internationally may not be eligible for protection from import competition under the laws of the countries in which their plants operate.

(d) Companies that are not United States-owned may seek legal protection from import competition under United States import relief laws.

72. The passage suggests that which of the following is most likely to be true of United States trade laws?

(a) They will eliminate the practice of "dumping" products in the United States.

(b) They will enable manufacturers in the United States to compete more profitably outside the United States.

(c) They will affect United States trade with Canada more negatively than trade with other nations.

(d) Those that help one unit within a parent company will not necessarily help other units in the company.

73. It can be inferred from the passage that the author believes which of the following about the complaint mentioned in the last paragraph?

(a) The ITC acted unfairly toward the complainant in its investigation.

- (b) The complaint violated the intent of import relief laws.
- (c) The response of the ITC to the complaint provided suitable relief from unfair trade practices to the complainant.
- (d) The ITC did not have access to appropriate information concerning the case.

74. According to the passage, companies have the general impression that International Trade Commission import relief practices have :

- (a) caused unpredictable fluctuations in volumes of imports and exports.
- (b) achieved their desired effect only under unusual circumstances.
- (c) actually helped companies that have requested import relief.
- (d) been opposed by the business community.

75. According to the passage, the International Trade Commission is involved in which of the following ?

- (a) Investigating allegations of unfair import competition.
- (b) Granting subsidies to companies in the United States that have been injured by import competition.
- (c) Recommending legislation to ensure fair.
- (d) Identifying international corporations that wish to build plants in the United States.

Directions (Q. Nos. 76-90) : Read the given questions carefully and identify the part which contains an error. Mark that part as your answer :

76. The number of Indians living in rural areas has decreased to unprecedented levels, (a) / with most farmers saying that (b) / their days in the country is numbered (c) / No error. (d)

P. T. O.

77. Beaming satellite images from Jupiter, a planet (a) / notoriously difficult to photograph, was a remarkable feat for a team of scientists, who, for the first (b) / time ever, were able to depict parts of the planet's atmosphere that were hitherto unknown. (c) / No error. (d)
78. The spread of the sea turtle to many reaches of the world's oceans (a) / do not show much as signal that the sea turtle has become (b) / a more robust species as it does the effects of climate change. (c) / No error. (d)
79. Although blessed with a strong economy, everybody, (a) / including the Home Minister and his family, are giving up luxury (b) / goods in order to donate more money to charity. (c) / No error. (d)
80. Careful examination of the pictures of the moon (a) / reveal that parts of the Moon's surface (b) / are markedly similar to parts of the earth's. (c) / No error. (d)

81. Of the two options, neither the system of appointing doctors nor the process (a) / of nominating doctors (b) / are entirely satisfactory. (c) / No error. (d)
82. He would not have been (a) / so happy if he did not have (b) / a very good life. (c) / No error. (d)
83. If the weather lasts (a) / for one more week, the farmers would not be (b) / able to bring in the harvest (c) / No error. (d)
84. If he hadn't met a certain woman, (a) / he might not understand that the hospitals in this city rob people without (b) / giving any proper treatment. (c) / No error. (d)
85. If she finishes her assignment in time, (a) / she will attend the function (b) / and dance with you. (c) / No error. (d)
86. If I knew about this competition (a) / yesterday itself, (b) / I would have participated in it. (c) / No error. (d)

(48)

XCS-600/601(B)

87. If she performed in a similar manner (a) / she would definitely (b) / win the gold medal (c) / No error. (d)

88. What if this change in agreement (a) / had been informed to us earlier (b) / we could have given it a second thought. (c) / No error. (d)

89. If I knew (a) / he was in trouble, (b) / I would have done (c) / something to bail him out (d).

90. If you had not messaged (a) / her we would never find (b) / out what was happening (c) / No error. (d)

Directions (Q. Nos. 91–98) : In the following questions, some part of the sentence is underlined. Choose the best option which can replace the underlined part and mark that as your answer :

91. The lions, each of which are a fine specimen, was raised entirely in captivity and never intended to be released into the wild.

(a) each of which are a fine specimen, was raised.

(49)

XCS-600/601(B)

(b) each of which are a fine specimen, were raised.

(c) each of which is a fine specimen, was raised.

(d) each of which is a fine specimen, were raised.

92. A majority of the shareholders wants the company to pursue a more aggressive cost-reduction strategy because they fear that low-cost competition from Asia has the potential to put them out of business.

(a) wants the company to pursue a more aggressive cost-reduction strategy because they fear that low-cost competition from Asia has the potential to put them out of business.

(b) want the company to pursue a more aggressive cost-reduction strategy because they fear that low-cost competition from Asia has the potential to put it out of business.

P. T. O.

(50)

XCS-600/601(B)

(c) want the company to pursue a more aggressive cost-reduction strategy because they fear that low-cost competition from Asia has the potential to put them out of business.

(d) wants the company to pursue a more aggressive cost-reduction strategy because it fears that low-cost competition from Asia has the potential to put the company out of business.

93. In such a dismal investment climate, neither of the long/short equity funds have greater than a 50% chance of outperforming their benchmark.

(a) neither of the long/short equity funds has greater than a 50% chance of outperforming its benchmark.

(b) neither of the long/short equity funds have a greater than 50% chance of outperforming their benchmarks.

(51)

XCS-600/601(B)

(c) neither of the long/short equity funds have greater than a 50% chance of outperforming its benchmark.

(d) neither of the long/short equity funds has greater than a 50% chance of outperforming their benchmarks.

94. Rational creatures can make items that augmented the natural capacities of themselves and other beings in ways that transcend the limitations of naturally gave substantial forms.

(a) Rational creatures can make items that augment the natural capacities of themselves and other beings in ways that transcending the limitations of naturally give substantial forms.

(b) Rational creatures can make items that augment the natural capacities of themselves and other beings in ways that transcend the limitations of naturally given substantial forms.

P. T. O.

(52)

XCS-600/601(B)

(c) Rational creatures can make items that augment the natural capacities of themselves and other beings in ways that transcend the limitations of naturally given substantial forms.

(d) Rational creatures can make items that augment the natural capacities of themselves and other beings in ways that transcend the limitations of naturally given substantial forms.

95. The number of high school drop-outs are increasing at an alarming rate in most of the schools in northern areas of California.

(a) The number of high school drop-outs is increasing at

(b) The amount of high school drop-outs are increasing at

(c) The number of high school drop-outs is increasing in

(d) The number of high school drop-outs are increasing with

(53)

XCS-600/601(B)

96. Knowing the roots of words that are hard to spell helps students to become a better speller.

(a) helps students to become a better speller.

(b) is helpful to students who want to be a better speller.

(c) helps students to become better spellers.

(d) is helpful to students in becoming a better speller.

97. In the modern day world, despite all the scientific advancements, none of the world's most renowned doctors are able to find a cure for the common cold.

(a) none of the world's most renowned doctors have the ability to

(b) none of the world's most renowned doctor is able

(c) none of the world's most renowned doctors is able to

(d) none of the world's most renowned doctors are able to

P. T. O.

98. Modern bluegrass songs, telling of love and despair and celebrating mountain beauty, reflects the genre's rural origins.

- (a) Modern bluegrass songs, telling of love and despair and celebrating mountain beauty, reflects the genre's rural origins.
- (b) Modern bluegrass songs, telling of love and despair and celebrating mountain beauty, reflect the genre's rural origins.
- (c) Because modern bluegrass songs tell of love and despair and also celebrating mountain beauty, they reflect the genre's rural origins.
- (d) With modern bluegrass songs that tell of love and despair and celebrate mountain beauty, they reflect the genre's rural origins.

Directions (Q. Nos. 99-100) : Read the given paragraphs and answer the questions that follow :

Iguacu Falls, which sit on the border between Argentina and Brazil, are said to make Niagara look like a leaky faucet. The great cataracts stretch for two and a half miles across lushly foliated rocky outcroppings before plunging a staggering two hundred and thirty feet into the river below. The falls region is densely forested, and is home to a wide variety of plants and animals, including a number of endangered ones. It is a paradise where parrots dive and swoop through the spray, butterflies cavort among the tropical plants and coatis, and giant otters and anteaters amble through the trees. The foliage itself varies between tropical and deciduous with orchids blushing in the shade of pines and ferns nodding gracefully in the shadow of fruit trees.

99. The author's attitude toward Iguacu Falls can best be described as which of the following ?

- (a) Overweening pride

P. T. O.

- (b) Positive appreciation
- (c) Mild acceptance
- (d) Apathetic objectivity

All registered motorists have passed an examination covering traffic rules and safety. Those interested in the new Motor Share Program must register their motors and provide a major credit card to ensure payment. Call ABC-XYZ for more information.

100. Identify the tone of the author in the above paragraph :

- (a) argumentative
- (b) caustic
- (c) vitriolic
- (d) informative
